

# Has your alloy scaffold tower seen better days?...

**Replacement components  
available from stock today**

**...Get up to spec with**

**Using dated equipment to work at height can be dangerous and your existing tower might not meet current Work at Height regulations.**

We can assess what you really need to bring your access equipment up to spec whatever the make. As Distributor for Instant UpRight, the world's leading alloy tower manufacturer, we will inspect your existing towers and other equipment and advise a cost-effective solution.

Work with a specialised company who will help you make an informed decision and ensure that you are not compromising on safety.

**We can supply brand new INSTANT towers if you are looking to replace or add to your existing work at height equipment.**

# INSTANT SPAN

Whatever your sector, whatever the task, if versatility and speed are central to your access problem, then the Instant range of modular tower components should be the first place you look.

There's a large range of different tower configurations, integral ladders, façade systems, walkways and fold-away SNAPPY work platforms, that whether you need to kit out an entire construction site or simply want to change a light bulb in your office, there's only one way, the INSTANT way.
